

THE Gleichen Call

TWENTY-SIXTH YEAR NO. 31

GLEICHEN, ALBERTA, WEDNESDAY OCTOBER 19, 1932

SUBSCRIPTION \$2.00 PER YEAR

GOVERNMENT AWAITS CRITICISM OF ENLARGED M. D.

Consideration of the Alberta government proposed plan of enlarged municipal districts, as announced sometime ago, has advanced another stage with the presentation of the plan to the association of municipal districts for discussion. The scheme has been before the executive of that association for some weeks, and the complete details will come before the convention of the association in November.

In the meantime the government itself has been giving further consideration upon the general principals involved.

It will be remembered from the announcement made previously, that the plan is to create some forty enlarged municipal areas by amalgamation into suitable groups of the 166 municipal districts now in existence, together with 143 of the local improvement districts at present administered by the department of Municipal Affairs at Edmonton. The main object sought is a considerable economy in administration, both municipal and governmental, and greater efficiency throughout. It has been estimated that a saving of some \$250,000 could be made in the municipal districts alone, with a further considerable economy in provincial expenditures by the transfer of control of the 143 local improvement districts from the government at Edmonton to the various newly created councils.

Boundaries of the proposed 40 new districts were arrived at after a careful study of all phases of the question and were based on certain general principles, such as economic considerations, localities having a common interest, physical characteristics, etc.

Aside from the considerable economy to be effected, other advantages would be a more equalized assessment and a more equalized tax burden, and a more uniform system of road building.

One of the problems with which the government has been faced in considering the new plan is the adjustment of assets and liabilities of the various units to be included in the new areas.

In determining boundaries, of necessity some of the less fortunate units would be grouped with the better class areas, necessitating a policy of equalization. It is proposed that if and when the enlarged areas are formed, the new councils will be required to examine the surpluses and deficits of each included area, and report to an existing board or a board specially set up, for the purpose of determining how the surpluses of deficits shall be dealt with. The thought at the moment is to preserve the uniform rate of taxation, with the probability of relieving the areas which have surpluses, and surcharging the areas

GUNNERS GETTING READY FOR HOCKEY SEASON

A meeting of the Gleichen Hockey Club was held and many matters cleared up. At this meeting the following officers were elected:

Honorary presidents, G. H. Gooderham of Gleichen, and A. G. Bond of Bassano.

President, Wm. McConnell.
Vice-President, James Black.
Secretary-Treasurer, W. J. McKay.
Manager, Jack Moss.

The executive is composed of the president, vice-president, secretary and manager.

The financial statement which was published sometime ago by the secretary-treasurer of the club, W. J. McKay, was approved and adopted. Elaborate plans were made for this winter season and the expectation is that a stronger team than ever will be in the field. The boys are determined to fight to retain the laurels of the Provincial championship and to do their utmost to come up to expectations of Gleichen fans.

A small amount of money is on hand from last year's operations and in order to swell the coffers of the club a Halloween dance will be held in the Gleichen Community Hall on Friday, October 2nd. Messrs. McKay, McConnell, Brown and Moss are acting on a special committee for this occasion. If the dance returns a dividend sweaters and stockings will be purchased for the team. The colors of the uniforms has not yet been decided on but will be of a kind that will not conflict with the neighborhood.

The following are the players who will don the colors of the Gunners in an endeavor to hold the provincial championship for the club:

Goal, Roberts, defence and forwards Maynard, Marquette, T. Johnston, C. Brown, T. Brown, S. McKay, B. Taylor, Bulmer, Simpson.

Since the meeting was held a proposal has been made the Gunners to enter a senior league. At the present time it is not thought Gleichen will enter this league owing to the outlay of money that will be necessary to finance the team in this venture.

with deficits. Authority would be given to apply varying rates spread over a period of years to be determined by such a board so that equalization can be brought about with no undue hardship to any particular area.

Following discussions which have taken place on the proposal, a new map has been prepared showing the proposed grouping of municipal districts, and this map will be made available to the public presently. The map is of course tentative and may be altered if public discussion shows it to be in the best interests of all concerned.

—From the Columbus (Ohio) Dispatch.

FAIR ENOUGH TO BOTH

QUEER QUINTON'S QUILL

When Quinton came in to the chestfield, he gently lifted the old cat who was comfortably curled up in Quilla's corner. And it was well that he did for "the chestfield was no place for a cat," but in spite of scoldings and a few whacks that old cat would sneak every opportunity to use it. And just like a man, Quinton would shield the old rascal every time.

"Tom," he said, as the cat slipped between his hands, "it's lucky I found you tonight."

Quilla stretched himself quite unconcerned as if to say "If I have the Chesterfield, well, I can't have it," and circling a couple of times, he curled up on the mat before the fire. It had been a long day for Quilla and she was tired, very tired. She had been cleaning and roasting chicken for the church supper. And of course there were cookies, pies, jellies and the many other things. Quinton's pipe was just going nicely when Quilla took the place lately vacated by the cat.

"Pretty tired tonight?" asked Quinton. "Yes."

And the quiet way she said it revealed more of real exhaustion than could be expressed in a whole paragraph of learned eloquence.

"Don't you think that it is a lot of work for what we get out of it?" suggested Quinton.

Quilla was just too tired to want to take up the argument and that was saying a lot for her.

"And if church folk," continued Quinton, "would count the cost of what we have to put up at these feasts and give it in cash to the church budget, we would be further ahead."

When the question of the annual supper came up, Quinton, realizing the social value of such gatherings, was enthusiastic about it. But he had noticed the increase in the food bill and now the flushed face of his wife brought home very forcibly the fact that not only our churches but too many of our other institutions move on the backs of tired women.

For some minutes they sat quietly and both were seriously asking if it were really worth while. And just those few minutes revived Quilla's old argumentative spirit.

"But," said the good lady, "this is no time to talk about subscription lists. We have the supper on our hands and we must make it a success. And when it is time for the collectors to go out on their canvases, you men will be saying how much easier it is to raise money by supper and teas." And Quinton thought it was time for bed.

A SANE HALLOWEEN

Whisperings have been overheard among the younger generation of what they intend to do on Halloween, which will soon be here. This one evening of the year is cherished by the younger generation as being night when they can make their own selves and have a real jolly time. We of the older generation feel that we would like to go back a few years and join with them in their fun, but alas, that cannot be. We must sit on the sidelines so to speak, and enjoy in a quiet way the pleasures which the children are getting out of their night's frolic.

However, there is a vast difference among children as to what constitutes a night's entertainment. Some of them, especially the younger ones, go harmlessly from door to door asking for and in most cases receiving, apples, nuts, candies, etc. They do not plan on creating any disturbance, and in this they are indulged. Others, older in years, feel themselves above this way of spending Halloween and go out for an evening on mischief bent. Anything lying loose around private property and business premises is removed and in many cases real loss is caused by the destruction of property. Roads and sidewalks are cluttered up to the danger of the travelling public. This form of entertainment should not and cannot be tolerated as it may mean the loss of life or the crippling of some person.

You boys and girls who are planning on celebrating Halloween should make those plans with the object of tabooring anything that savors of causing damage or annoyance. You can have just as good a time through innocent pleasure with a great deal more of satisfaction afterwards if rough stuff is cut out of your plans. Parents of Gleichen could help out very materially if they would advise their children to avoid anything savoring of rough stuff.

Come, boys and girls, what say? Let's have fun Halloween but let that fun confine itself to real enjoyment without any aftermath. N. Cevaer will hold an auction sale of his household effects, at his home at Cluny, on Saturday, Oct. 29. T. H. Beach will be the auctioneer. Extensive plans are being laid for anniversary services and the annual chicken supper of the United Church. Rev. H. D. Leitch of Drumheller will be the guest speaker at the Sunday evening worship and will lecture on Monday evening. Plan to be present on both evenings, Oct. 30th and 31st.

The bridge and whist drive in aid of the rink will take place on Monday evening next instead of Friday this week. All are invited.

"Dirigible" is the picture for Saturday night. This is a big picture with thrills and heart throbs galore. In making this picture there were no fatalities of stunt men although several narrowly escaped with their lives when their calculations miscarried.

NEW SKATING RINK ALMOST READY FOR USE

Under the leadership of Bob Brown a gang of men and a dozen or so horses were busy last week hauling earth out of the rink and leveling off the surface of the ground before freezeup. Several feet of earth had to be moved from approximately two-thirds of the ice area and hauled outside. Looking at the great pile of earth moved it is possible to realize to some extent the vast amount of earth removed.

The ground now in the rink is about as level as it is possible to make it. The entire ice area has yet to be boarded up and this will entail several days more work.

The new rink is a vast improvement over any rink Gleichen has ever had. No more will the crowd leaning against the fence find themselves and the fence measuring their length on the ice. This happened one night and it was a miracle that no spectators or players were hurt in the fall of several feet.

The new rink is now completely boxed in and for this winter the sky will be used for a canopy. Most of the seats are in place and with the gallery and standing room approximately 1500 people could be easily accommodated.

The front part of the rink is completed. This part is a large lean-to building built clear across the width of the rink and roofed in. It is so constructed that when the roof of the main rink is built it will adjoin it. The roof is built in cottage style and houses a substantial looking building, in which are contained the dressing and waiting rooms, ticket office and a room for storage purposes. The entrance is through double doors with the ticket office at the right as one enters and in case of a rush two ticket sellers will be able to accommodate the crowd. In the lobby will be a turnstile while to the left of it is a large gate which, when a game is over will be swung open to let the crowd pass out rapidly. There is also a side door half way up the south side of the rink this, also, can be used to let people out.

On the north side of the rink, in the centre space has been left for the players, timekeepers, press reporters, etc.

Now all that is needed is lots of support at the whist drives, dances and hockey games to get the existing debt of the rink wiped off and then the roof will be put on. So here is hoping for a successful 1932-33 season.

The Gleichen Women's Catholic League will hold a bridge and whist drive, Thursday, Oct. 27, in the Odd-fellows Hall, at 8:30 p.m. Special Halloween attractions and snappy orchestra in attendance.

PREPARING FOR THE OLD TIMERS' BALL

For the seventh time the Old Timers' ball will take place in the Gleichen Community Hall on Friday, November 25th.

Many hundreds of invitations will be sent out to all Gleichen friends of the entire district. Already posters are out announcing the big affair. Six beautiful prizes will be given away during the evening. Everyone is expected to have a grand time with the grand march beginning at 9 p.m., with fiddles and drums, etc., blazing away, with the old timers shaking a wicket hoof, with nearly every old timer from far and near present that night and with everyone in for a good time. The date has been chosen not to conflict with any other activity known at the present time and it is therefore, intended to give everyone desiring to attend, the opportunity of coming to Gleichen on this memorable night. The Gleichen Board of Trade being behind this Old Timers' Ball, all the necessary arrangements will be gone into in great detail and nothing will be overlooked to give everyone a splendid time and to make the occasion a huge success.

GLEICHEN FLOUR MILL

The advertising department of the Gleichen Flour Mill has no receipt to offer for making men, but it naturally thinks that the finest type of men are not made by feeding them on skimmed milk. That is, on second grade flour.

Beau Ideal Flour is made from thoroughly cleansed No. 1 Hard and No. 1 Northern wheat. It is 100 per cent pure and contains the full strength of high grade wheat. In other words the cream is not skimmed off in the making, and is therefore exceptionally high in food values.

Use Beau Ideal Flour.

Only 1 Out of 100

By Bruce B. Brewer, Vice-Pres., Ferry-Hanly Advertising Company

As I write this I have before me a big city newspaper having a circulation of 200,000. Here is the advertisement of a grocer in an outlying residential section. Not more than 10,000 families live within trading range of his store. Because the pages are crowded with other ads, probably not more than one out of five of that 10,000 sees it.

Only one out of 100 readers of that big city paper is useful to that merchant! He pays for 99 others—99 out of every 100—which are wasted readers to him. And there are many such advertisements in the paper.

Contrast this with your weekly newspaper. Everyone is a prospect. Everyone is within trading range. Everyone reads every page because on these pages is the most interesting news in all the world:

news about people they know.

No city newspaper can compare on a basis of page-to-page readability. No city merchant has the advantage you have, Mr. Merchant, in the advertising columns of your weekly.

I asked the city grocer mentioned above if his advertising is profitable at the high rate he has to pay. At first he said it was not, but after using it regularly he finds it pays. I told him then of the opportunities small city merchants are passing up to use, at low rates, local weekly circulation that is 100 per cent useful, with no waste. He cut loose with criticism of those merchants that was so vigorous and forceful I could not repeat it here without fear of wounding the sensibilities of the readers of this column.

Whisperings have been overheard among the younger generation of what they intend to do on Halloween, which will soon be here. This one evening of the year is cherished by the younger generation as being night when they can make their own selves and have a real jolly time. We of the older generation feel that we would like to go back a few years and join with them in their fun, but alas, that cannot be. We must sit on the sidelines so to speak, and enjoy in a quiet way the pleasures which the children are getting out of their night's frolic.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Charles McCrea predicts that Ontario will produce \$100,000,000 in gold annually.

Carman A. Holmes has been appointed postmaster at Churchill, Man., with a fully equipped office.

Over 25,000,000 apples left St. Lawrence ports for Great Britain, Ireland and South Africa within one week.

Robert Kromfeld, veteran glider pilot, put his new sailplane "Austria II," through six successive loops in a flight at Vienna.

J. H. Thomas, Dominions secretary, speaking at Newport, England, said British people want peace with the Irish Free State.

Hon. H. H. Marler, Minister to Japan, addressing the Vancouver Board of Trade, urged still greater improvement of Canadian sales in the Orient market.

The House of Commons may decide this session whether Canada will adopt a distinctive flag, Cameron R. McIntosh, Liberal, North Battleford, has given notice of a resolution asking for a distinctive flag.

Vancouver welfare federation will ask citizens of Vancouver to contribute \$400,000, it was decided when plans were laid for the 1932-33 campaign. Last year a total of \$305,000 was asked for.

An optimistic outlook for lumbering operations in the province of Quebec this winter is seen by Hon. Honore Mercier, minister of mines and forests. He predicts that 650,000,000 feet of lumber would be cut, giving employment to 20,000 men.

The average protein content of Canadian wheat has been in general steadily increasing during the last five years and present indications are the 1932 crop will maintain the high figure of a year ago; the grain research laboratory of the Board of Grain Commissioners reports.

Applications from those desiring to locate in Churchill, Hudson Bay port, will now be received by the Department of Natural Resources and Industry, and the townsite will be open for settlement next spring, J. S. McDermid, Minister of Natural Resources and Industry for Manitoba, announced.

Taking Precaution

"Every window in your house was lit up last night. Did you have a big party?"

"No, but my wife is returning from her holidays today and if she notices the small consumption of gas, she'll be suspicious."

A new porcelain on the market cannot be cracked when hit with a hammer or mallet. It only shows a slight dent after a blow.

Fires are increasing in England so rapidly that the insurance companies are worried.

Origin Of Tennis

Game Played Half Century Ago Was Very Different

There are more than 20,000 public and club lawn tennis courts in Great Britain now, and the number of tennis players goes up every year by leaps and bounds. Yet the game is barely fifty years old. The original lawn tennis was called Sphairistike. Half a century ago it was played on courts of hourglass shape with a net six feet high in the middle. The rackets were rather like queerly-shaped shrimping nets and the game was pure bat and ball. It was played by ladies with wasp waists who held up their long skirts in one hand, and men whose costume consisted of tight knickerbockers, striped stockings, walking-boots, jerseys and—bowler hats. The original lawn tennis balls were of plain rubber, but later the covered ball came into fashion. In its early days it was usually coloured and often ornamented with fancy stitching.

Winter May Be Cold

New York Man Bases Prediction On Law Of Averages

The winter will be long and cold, as James H. Scarr, U.S. Government meteorologist, sizes it up; and then again it may not. It all depends on whether the winter follows the law of averages or gets bull-headed.

The last five winters the meteorologist explained, have been mild. Each warm winter, under the law of averages, brings a cold winter just that much nearer.

One cannot, however, be sure. Mr. Scarr suggested that those who are interested might observe the temperature during October. In 80 per cent. of recorded cases warm Octobers have been followed by warm winters.

New First Sea Lord

Sir Ernie Chatfield Was Beatty's Flag Captain During War

As Flag Captain to Lord Beatty in the "Lion" and the "Queen Elizabeth" all through the war, Sir Ernie Chatfield the new First Sea Lord, served in the three principal actions of Heligoland, the Dogger Bank and Jutland. He is a gunnery specialist. He was a man of the moment in the crisis at Jutland. The "Indefatigable" had been sunk, the "Queen Mary" had gone up in flames, the "Lion" was in flames too. Then a tremendous salvo struck the "Princess Royal" and she too vanished. A signalman reached the "Lion's" bridge where stood Vice-Admiral Beatty as he then was. "Princess Royal" blown up, sir," he said, Beatty turned to his Flag Captain, saying, "Chatfield, there seems to be something wrong with our ships today. Turn two points to port." That meant two points nearer the enemy—and it meant, too, that the crisis of the battle was surmounted. The British battle cruisers began to assert an ascendancy over the enemy and our ships received no further serious injury. Full testimony to the accuracy of the British gunnery has been given in German accounts of the battle.

Eat Celery For Health

Ranks Higher Among Vegetables As a Source Of Mineral Supply

It is doubtful if any of the common vegetables can compare with celery as an aid to general health. Most physicians agree that as a blood purifier and for ridding the body of toxic substances, this vegetable is in a class by itself.

Like most leafy vegetables, the purpose of celery in the diet is not to provide heat or energy, but rather to furnish the vitamins, minerals and other secondary food so essential to good health. As a source of minerals, celery ranks high among the vegetables, being particularly rich in lime and magnesium. For this reason it is a great blood regulator and tends to combat any tendency to excess acidity. Celery is also a valuable source of vitamins, being one of the best for vitamin "B."—Dominion Fruit Branch.

Korea Grows Apples From Canadian Trees

Dr. Hardie, Medical Missionary Planted Them Many Years Ago

Forty-one years ago in Korea were planted Canadian apple saplings by a Canadian medical missionary, and today the apple trade is one of the most flourishing in Korea.

Dr. R. A. Hardie, of Caledonia, is in Toronto on furlough. In 1890, after graduating from the medical school here, he went to serve in Korea, and wrote to his dentist brother in Toronto, Dr. E. S. Hardie, to send out some apple trees. Now apples grow in rich abundance in Korea and today she exports the fruit to her sovereign state, Japan.

German Ship On Great Lakes

Freighter. Made. Round. Trip With Cargo Of Pulpwood

What is believed to be the first German ship to fly the Republic's flag through the Sault Ste. Marie canals, both ways, passed through in a recent week downbound and proceeded to Manistowish with a cargo of pulpwood. The ship, "Heinrich Arp," is from Hamburg. It brought a cargo of pulpwood from Revat, for Duluth and Manistowish. It was expected to go from Manistowish to Chicago and take a cargo of corn or wheat back to the Old Country.

Idea Not So Good

"You know Robinson? Well, he owed me \$10 and I could never get it back. So when I heard he'd started a debt-collecting business I wrote and asked him to collect my debt of \$10. He wrote back and said that all his efforts had failed, and charged me a guinea expenses."

If every family of London had a home of their own 240,000 additional houses would have to be built, says an expert.

for COUGHS

Take half a teaspoonful of Minard's Liniment in milk, or water, three or four times a day. It is well into your chest.

MINARD'S LINIMENT

"KING OF PAIN"

NURSE LOSES 7 LBS.

"I weighed 145 lbs.," writes a nurse, "when I bought the bottle of Kruschen Salts which I have just finished. I have taken a good half-teaspoonful in a glass of hot water every morning. Now I weigh 138 lbs., a loss of 7 lbs. I am very glad to have lost weight, especially without trouble."—M.H.R. (Train Nurse.)

Unlike most salts, Kruschen isn't simply a laxative. When you take Kruschen Salts you not only stimulate your liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with Nature's own revitalising and rejuvenating minerals.

Get a bottle of Kruschen Salts today, and take one-half a teaspoon in a glass of hot water every morning before breakfast.

Before the bottle is empty you'll feel years younger—eyes will brighten—step grow sprightlier—nerves steadier—you'll sleep sound, enjoy your meals, and after a hard day's work you'll be ready for wholesome recreation—one million women already know all this.

Fighting Days Are Over

Jellicoe's Flagship To Become a Gun-nery Practice Vessel

Two of Britain's famous fighting ships will soon leave Portsmouth for the last time. The "Iron Duke," Earl Jellicoe's flagship in the Battle of Jutland, is to become a gunnery practice vessel. Most of her fittings, already removed when she was originally ordered scrapped under the London Naval Treaty, have been retrieved.

The cruiser "Terrible," which is leaving for Newport, Monmouthshire, for breaking up, became famous in the South African War, when her guns and naval ratings were rushed at the last moment into Ladysmith and helped Sir George White to sustain the siege for several months.

After lying 60 years in the River Thames on loan from the Admiralty, the training ship "Arethusa" has finally been condemned. The vessel will be replaced by the German sailing ship, "Peking," which will be renamed the "Arethusa." The condemned "Arethusa" was the last British vessel to proceed into action under full sail. This action took place during the Crimean War.

Contains Many Valuable Recipes and Is a Masterpiece Of Kitchen Lore

The Purity Cook Book is vastly more than a good cook book. It is a real guide to economy and good management. It represents two years' works in collecting, testing and editing.

Extra care has been taken to make the "method" for each recipe so simple and clear that even the amateur can follow each step without difficulty.

Over 60 recipes for cakes, 38 for salads, 40 for sandwiches, 40 for lunch and supper dishes, 38 for puddings, 50 for bread, quick breads, fancy breads, sweet doughs, rolls, biscuits, etc., also hundreds of other recipes and housekeeping suggestions. Recipes are given for making breads, biscuits, muffins, waffles, griddle cakes, cereals, canapés, cocktails, soups, invalid dishes, fish, meats, poultry and game; vegetables, salads, dressings, puddings, sauces, cakes, cookies, small cakes, cake icings, fillings, pastry, plain Danish, puff, gelatine desserts, ices, apple dishes, preserving, canning, luncheon and supper dishes; sandwiches, pleasant drinks and home made candies.

Order your copy today—the first edition is limited. In grease-proof cover to any address in Canada, 50 cents postpaid. To points outside Canada, 60 cents postpaid. Write to Western Canada Flour Mills Co., Ltd., Toronto, Winnipeg, or Calgary, sending name and address enclosing 50 cents.

Statistics prove that for every three men aged between 75 and 80 there are four women. For every four men over 85 there are seven women.

First Bank President—So you let your old bookkeeper go. Couldn't he balance his accounts?

Second Bank President—Balance his accounts! He could juggle them.

Important Medical Discovery

McGill University Achievement Holds Great Possibilities

Success which has been achieved at McGill University, Montreal, in finding a method of obtaining X-ray photographs of the liver and spleen, through the use of solution of thorium dioxide is chiefly of interest because of the great possibilities that it envisions in the future, according to authorities of the McGill Medical School. Application of this or some similar method to other internal organs, such as the brain cells, for instance, would be a tremendous advance, if this could be accomplished.

The work that has been effected at McGill in connection with photographing the liver and the spleen is reported in the Canadian Medical Association Journal, in an article by Dr. R. Gottlieb, Flinn, research fellowship student, who has been conducting research investigations under the supervision of Dr. J. C. Meakins, director of the Department of Medicine at the McGill clinic.

The use of thorium dioxide is not new in itself, it was stated at the school, as it has been known and applied in Germany for some years, but the experiments carried on at McGill mark its first application to X-ray photography in this country. The definite success that has been reported by Dr. Gottlieb foreshadows a wider development along lines which he has thus far explored, with results that may prove of great value to medicine.

Chinese Have Weird Cures

Very Rarely Will They Take Medicine Used By Westerners

The recent case of Toy Fook, a Chinese boy in America, who when sick begged for broth made from the heart of a wildcat, invites attention to the queer native "cures" depended upon by the dwellers in the Chinese section of American cities. Importations into the United States from China include horns, bones, hair, feathers and tallow, but so far as customs records show, no wildcats' hearts.

The art of the Celestial apothecary is a furtive one in this country. Rarely will Chinese confide in a westerner, particularly when there is some suspicion that habits and customs which seem to them perfectly natural may be likely to transgress the curious maze of occidental laws with which they find themselves surrounded.

Their use, almost adoration, of the ginseng root, is well known. That harmless herb is looked on by the Chinese as a general tonic and, in fact, as a panacea. Ginseng, with Chinese, is as inevitable as chopsticks.

Orange peel ranks next to ginseng as a universal remedy. An infusion of tiger bones is believed to incite courage. The eyebrows of a toad, some Chinese believe, make an excellent snuff. Soup made from the paws of a bear is "indicated" for stomach disorders.

More Sheep

Increase Is Shown In Sheep Population Of Canada

From 1921 to 1931 there was a total falling off in the number of sheep in the maritime provinces and Quebec, of 270,917, and an increase of 692,924 in Ontario and the middle west and British Columbia, giving a net increase for Canada of 422,009 sheep. Alberta alone provides nearly 85 per cent. of the net increase in the decade, states a report of the Dominion Bureau of Statistics.

Value Of The Senate

"What good is the Senate, why do you have it?" asked a disgruntled one of Sir John Macdonald once as the man used the saucer to sip his tea, Sir John asked: "Why do you drink tea out of a saucer?" "Why, to cool it off, of course." "Well," replied Sir John, "that is what the Senate is for, with legislation."

In army strength Soviet Russia heads the list with 1,180,000; France comes second with 840,637; Italy, third with 241,886; and Japan fourth with 238,786.

Try Lydia E. Pinkham's Vegetable Compound

Had bad dizzy spells

Afraid to leave house . . . feared awful dizziness would make her keel over. She needs Lydia E. Pinkham's Vegetable Compound in tablet form.

Starts On Long Hike

Viennese Architect Proceeds On Foot To Visit World's Grain Show

Jules Salaman, a young Viennese architect, has already started out on a trip to visit the World's Grain Fair in Regina next year. But he needs an early start, for he is walking to the Saskatchewan capital and is earning his way by singing and playing his clarinet.

A picturesque figure clad in brown walking shorts, khaki shirt, high laced boots and a felt hat decorated with a cockade of flowers, Salaman has arrived in England and is now touring the British Isles before boarding a ship to cross the Atlantic. He is a student of architecture and an excellent vocalist.

The itinerant musician hopes to sing some of his Viennese songs for the king and queen as a finale to his British tour. He is a member of the Academie de Chanteurs de Vienne and has sung under the directorship of Bruno Walker and Felix Weingartner.

Recipes For This Week

(By Betty Barclay)

CRUMBLE PUDDING

3 eggs.
1 cup rice flakes, crushed.
1 cup sugar.
1/2 cup nuts, chopped.
1 cup dates, chopped.

Beat egg yolk and add to dry ingredients which have been thoroughly mixed. Fold in stiffly beaten egg whites. Pour into buttered loaf pan and bake in a moderately hot oven (375 degrees Fahrenheit) 45 minutes. Crumble and pile in sherbet glasses. Serve with whipped cream or lemon sauce. May be served hot or cold. Serves 6.

QUICK ORANGE JAM

(Makes 2 glasses)

2 cups orange pulp and juice.
1 lemon, pulp and juice.
1 1/2 cups sugar.

Boil quickly about 10 minutes or until syrupy and clear. Very good served warm on hot biscuits.

Bid On Mansion As Joke

English Builder Owns Estate He Does Not Want

Herbert Wightman, a jobbing builder of Wilford, England, owns a peer's house he does not want just because he entered into a joke. Wightman bought for \$25 the mansion called St. Hellers, at Nottingham, once the home of the late Lord Trent. He said he went to the sale to buy some land, and his bidding for the mansion was a joke with a friend. "When the bidding rose from \$18 to \$21, my friend said, 'Go on, Herbert, bid \$25.' I did so," said Wightman, "and another hammer came down, and that is how I bought St. Hellers." The house, which cost \$30,000, stands in spacious grounds, with tennis courts and a garden, and is in good repair, but there is a ground rent of \$580 which must be paid whether St. Hellers is occupied or not.

Ontario Buys Western Cattle

Purchases Made For Finishing For the Export Market

Ontario farmers are being encouraged to buy feeder cattle from Western Canada for finishing for local or export markets under a plan of financing announced by the Ontario Government Department of Agriculture. It is stated that arrangements have been completed with the Canadian banks whereby Ontario farmers will be able to borrow money with which to purchase feeder cattle from the Prairie Provinces. It is expected that this arrangement will result in increased supplies of well-finished cattle suitable for export to the British market. The plan goes into operation immediately and an official of the Ontario Department of Agriculture has been sent to Western Canada to supervise purchases.

Made a Difference

Jones (rolling his lawn, hot and tired)—"Hullo! Your father wants to borrow something as usual. I suppose."

Neighbor's Boy—"Yes, please Mr. Jones. He says could you 'blige him with the loan of a corkscrew?"

Jones—"A corkscrew? Certainly! You run along, Bobby—I'll bring it round myself."

A sloth cannot support its own weight on the ground. It spends its life hanging downward from tree branches.

Malaria causes 2,000,000 deaths all over the world every year.

RELIEVES COLDS WITHOUT "DOSING"

Woman Detectives On Scotland Yard Force

Valuable Aid In Locating Women Connected With Bandit Gangs

Having proved that they can keep a secret and know how to "mix" with criminals, women are being added to the detective force of Scotland Yard, in London, England. For months they have been secretly trained at Scotland Yard, and they have not divulged a word to anybody. Three are now "on the strength" of the Criminal Investigation Department. It is expected that another 20 or 30 will complete their training shortly, and will work with men detectives. All are young, and have been chosen largely for their capacity for forming friendships. Definite evidence has been obtained by the Yard that there are clever women criminals associated with modern bandit gangs, and the women detectives will aid in locating them.

Repaid In Kind

A hotly contested football match between a very skillful side and a very rough eleven was in progress, and the more polished players were leading.

Said one supporter of the leading team, in a superior tone: "What your fellows want, is a jolly good coach!"

"Yes," growled the partisan of the losers, "and what your team will want when our chaps have done with 'em will be a bloomin' big hearse!"

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard; Unpleasant to use; a bother to Wash

APPLEFORD WONDER PAPER HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical change. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Appleford Wonder Paper instead, because it actually dusts—as it cleans—as it polishes, doing a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rayon, and soft paper pulp, treated in a scientific way with a high-grade furniture polish; and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-five large sheets for twenty-five cents. You crumple a sheet into a soft wad and go over the surfaces requiring attention. Then when one side is soiled or worn, turn the Wonder Paper inside out. After you have given a quick and lasting finish to furniture and woodwork, you can still use Wonder Paper on the floors, if you wish.

And when you are through, there's no old duster to shake out or wash. Throw the soiled Wonder Paper away and you've completed the most tiresome part of housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, we'll be pleased to supply you from the factory. Just fill in and mail this coupon.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of Wonder Paper and your 100 recipes for "Left-overs."

Inter-Provincial Conference To Be Held Each Month

Regina, Sask.—The first of a series of western inter-provincial conferences each month will be held at Regina. The Federal Government will announce in the House of Commons the terms of sharing relief costs with western provinces.

A bonus on wheat will be requested from the Federal Government. These were the main decisions arrived at at a conference of prairie governments held at Winnipeg, according to Hon. M. A. MacPherson, attorney-general and provincial treasurer, who returned to Regina. No figure for the proposed wheat bonus was decided on, Mr. MacPherson told the press here and the question of whether it should be paid according to acreage or bushelage on this year's crop was left to Ottawa.

New Superintendent Of Indian Affairs

Dr. McGill Of Calgary, Succeeds Dr. D. C. Scott

Ottawa, Ont.—Dr. H. W. McGill of Calgary, has been appointed superintendent-general of Indian Affairs. He succeeds Dr. Duncan Campbell Scott who resigned.

Calgary, Alberta.—Official notice from Prime Minister E. B. Bennett was received by Dr. H. W. McGill, M.L.A., Calgary physician, of his appointment as deputy superintendent-general of Indian Affairs at Ottawa. Premier Bennett's telegram said the appointment had been approved by His Excellency the Governor-General, and Dr. McGill expects to leave for Ottawa about the beginning of November to assume his new duties.

Dr. Harold Wigmore McGill, M.D., M.C., V.D., was born December 21, 1879, at Norwood, Ontario, and was educated at Ontario schools and the University of Manitoba, Winnipeg, Man., where he obtained his M.D. degree. He was married December 12, 1917, to Miss Emma Mildred Griggs, of Kenora, Ontario.

Expect Announcement Of Marketing Board

Parliament To Be Asked For Immediate Action

Ottawa, Ont.—A marketing board to direct Canada's anticipated agricultural trade with the United Kingdom will be proposed in the House of Commons as a result of the trade agreement between the two countries.

Hon. Robert Weir, Minister of Agriculture announced a few weeks ago that a commission to inquire into the feasibility of a board would be established after the adjournment of parliament. It was intimated this would not satisfy certain Progressive and Liberal members particularly from western Canada who will propose the immediate establishment of the board so as to lose no time in operating.

Must Finish Hotel

Vancouver, B.C.—"The city of Vancouver will take court action to force fulfillment of the Canadian National Railways contract at the first sign of default," Mayor Louis D. Taylor said, when questioned concerning reports that the hotel now being built here might be disposed of for other purposes.

Electing New Deputy

Geneva, Switzerland.—After long political manoeuvring the League of Nations Assembly decided to elect two deputy secretaries-general, instead of only one, as has been customary. John A. M. C. Avenol, the French financial expert and deputy secretary-general, is generally expected to be promoted to succeed Sir Eric Drummond as secretary-general.

Mill Receives Large Order

Hamilton, Ont.—One of the largest hosiery orders ever given in Canada, for 1,000,000 pairs of silk stockings, has been received by a local mill and will keep the stocking department busy working night and day for the next six months.

Wins Fortune On Sweepstake

Kipling, Sask.—John Steele, 40, barber, won \$75,000 in the Irish Hospitals sweepstakes, with a ticket he held on Chelmarsh, an outsider that won second place in the Cesarewitch stakes run at Newmarket, England.

W. N. U. 1964

Communists Expelled

Soviets Out Twenty Prominent Members Of Committee

Moscow, Russia.—The central control committee of the Communist party expelled 20 prominent members, including Gregory S. Zinoviev, former chairman of the executive committee of the Third Internationale, and Leo Hameneff, brother-in-law of Leon Trotsky.

The expelled members were accused of organizing a counter-revolutionary group for the purpose of dissolving collective and state farms.

The Communists hit by the expulsion order are party men of long standing and former followers of Trotsky, who now is in exile in Turkey. They belonged to the right wing.

PREFERENCE ON WHEAT SHOULD BENEFIT WEST

Ottawa, Ont.—A highly optimistic picture of the benefits which will accrue to Canada by the tariff concessions granted to this country on wheat and wheat flour was given in the House of Commons by Prime Minister R. B. Bennett. He spoke of this farm commodity as at the moment "of most immediate importance to this country."

Free entry of flour as against a minimum general British tariff of 10 per cent. is secured to Canada under her agreement with the United Kingdom. A preference of six cents per bushel on Canadian wheat is granted.

"Not only does the increase in the sale of Canadian flour widen the Canadian wheat market, but Canadian flour is most important in promoting the direct sale of Canadian wheat," said Premier Bennett.

"In 1931, the total import of wheat flour into the United Kingdom was 6,141,192 barrels, of which 3,712,824 barrels came from British countries and 2,428,368 barrels from foreign countries. Canada being the chief British empire supplier with 2,225,490 barrels and the United States the chief foreign supplier with 1,187,190 barrels.

"This tariff preference should deflect to British empire countries a large part of the flour trade of the United Kingdom heretofore supplied by foreign countries.

"On wheat we have secured a preference of 2s. per quarter. Article 4 of the agreement makes the continuance of this preference, as well as the preference granted in respect to copper, zinc and lead, conditional upon empire producers of these commodities being able and willing to offer them a first sale in the United Kingdom at prices not exceeding the world prices and in quantities sufficient to supply the requirements of the United Kingdom consumers.

"I have never at any time represented to the wheat growers of this country that the effect of a preference would be to set up in their favor a price differential in world markets and at the expense of the British consumer. What I did maintain was that it was vital to us to find a secured market in the United Kingdom which is now by far, and is likely to continue to be, the greatest wheat consuming country in the whole world.

"There is no need of emphasizing the value of this market to Canada. The preference, it is agreed, will substantially increase the purchase of Canadian wheat by British importers.

RETIRING ASTRONOMER-ROYAL'S CONTRIBUTION

It is the custom of every Astronomer-Royal to make some addition to the great Observatory at Greenwich, England, upon retirement, and above is the new telescope, which is to be Sir Frank Dyson's contribution. The dome and building, almost completed, will house the new 36-inch telescope.

NEW QUEBEC SENATOR

J. H. Rainville, K.C., former chairman of the Montreal Harbor Commission, who has been chosen to fill one of the Quebec vacancies in the Senate.

"Bright Fan" Sinking

Mishap Should Not Affect Safety and Feasibility Of Bay Route

The Pas, Man.—The feasibility and safety of the Hudson Bay route should not be affected by the recent sinking of the "Bright Fan."

The mishap was an act of God, declared Captain R. E. Oliver, commander of the grain steamer, upon his arrival here from Churchill.

Captain Oliver declined any statement regarding details aboard his ship when the crash came, but members of the crew declared everything was in order. Lookouts were at their posts.

Captain Oliver was reticent about telling of the accident, stating he did not wish to commit himself until he reaches the east and the enquiry into the disaster is held.

"I shall be glad when it is all over and all the facts are known to the proper authorities," he declared.

"The striking of the iceberg by the ship was an accident that no man could avoid and was one of those tragedies that strike in the night," the captain said.

Churchill is a coming port and will become the centre of one of the biggest trade and shipping routes in spite of the loss of the ship, he said.

Winnipeg Asks Action On Jobless Problem

Will Ask Federal Government To Relieve City Of Transients

Winnipeg, Man.—Immediate action on the part of the Dominion Government to relieve city of the transient unemployment problem is demanded by city council. A resolution was adopted petitioning the government to provide every transient with transportation to his legal place of residence and proper food and accommodation while stranded here.

More than 3,000 transients have been taken off freight trains here within six days in accordance with the Dominion Government's ban on road riding.

Last Ship For Season

Churchill, Man.—Nosing her way through a sea as calm and clear as it was turbulent when she came in the previous week, the steamer "Pensilva" is outward bound from here, the last boat to leave this northern port this autumn and the 10th to carry grain overseas by the new Hudson Bay route this season.

Advances Plan For Circulation Of Money

Solution To Economic Problem Suggested By A. C. Stewart

Springside, Sask.—Offering a solution to the present economic difficulties by advancing a plan of putting more money into circulation in Canada and reducing the rate of interest, Hon. A. C. Stewart, Minister of Highways, spoke here.

He suggested a bank or commission be set up as a branch of the federal government for the purpose of handling all fiduciary money and gold. This banker commission would be authorized by the Dominion government to issue fiduciary money to such extent as could be absorbed under conditions fully explained by Mr. Stewart.

He stated that the result of this plan would mean that high-priced government securities would no longer be available to capital in Canada, but instead would be available to carry on industry and commerce.

The effect of sufficient money being put into circulation in the Dominion would mean that all great investment bodies and investors, not having access to government or municipal securities, would loan their money to industry and it would go into commercial channels at reduced rates of interest.

WAY IS OPEN FOR INCREASED TRADE WITH BRITAIN

Ottawa, Ont.—Free entry into the United Kingdom market for Canadian manufactured products excepting in respect of a very limited list of goods.

Preferences in the United Kingdom market on Canadian goods ranging from 10 per cent. to 33½ per cent.

Canadian manufactured goods which enter the United Kingdom free under the agreement number over 100 commodities.

The list includes certain kinds of paper, aluminum, stoves, typewriters, and a long list of hardware; leather, furs, rubber and textiles, chemicals and miscellaneous goods.

Preferences in the various British colonies.

Preference in the United Kingdom market practically the entire range of Canadian natural products.

Free entry into the United Kingdom market for certain timber products.

Regulation of the British bacon market, and an arrangement whereby free entry of Canadian hams and bacon of good quality up to 2,500,000 cwt. per annum will be concluded.

Modification of conditions at present governing importation into the United Kingdom of Canadian live cattle.

Free entry (except for sugar duty) to the United Kingdom market for three years certain on Canadian sweetened condensed milk.

Free entry into the United Kingdom market on creamery butter for three years certain as against 15 shillings per cwt. (112 pounds) general tariff and a preference margin of 15 shillings per cwt. during the life of the agreement.

Free entry for Canadian cheese into the British market for three years, with preference margin of 15 per cent. to be maintained during the currency of the agreement.

Preferences in the British market on Canadian tobacco.

Free entry into the United Kingdom market on fresh apples as against a duty on foreign apples of four shillings and six pence per cwt.

A preference of 10 per cent. on Canadian potatoes, but at present there is an embargo in force.

Free entry to the United Kingdom market for three years certain, to Canadian eggs in shell as against certain specific duties against foreign eggs.

A preference of seven shillings per cwt. on Canadian money in the British market.

A preference of 10 per cent. in the United Kingdom on Canadian barley.

Free entry for following Canadian grain and grain products with a 10 per cent. ad valorem preference: Wheat flour, rye, oats, peas, clover seed, hay, beans, shorts, and midlings, oatmeal and rolled oats.

Free entry for Canadian wheat as against a general tariff of three pence per bushel.

Preferential rates on Canadian confectionery in United Kingdom market.

Free entry on unsweetened milk powders as against a general tariff of six shillings per cwt.

Act Effecting The Redistribution Of Seats Is Read In Commons

Increase In Bacon Exports Anticipated

Amount To Be Shipped Will Depend Largely On Prices

Ottawa, Ont.—C. B. Rothwell, Dominion Livestock Commissioner, announces Canada's export of bacon and hams to the United Kingdom during 1932 will total between 40,000,000 and 50,000,000 pounds, more than twice the amount ever shipped there in any one year.

The new Ottawa agreement will permit a shipment of some 280,000,000 pounds a year, from seven to eight times the present figure. The amount to be shipped will depend largely on prices, Mr. Rothwell believes. If higher prices are obtained the Canadian farmer will increase his production.

C. E. Elford, Dominion poultry husbandman, sees possibilities of a great increase in the export of eggs to the United Kingdom. Increased exports of butter, cheese and condensed milk are forecast by W. E. Stephen, secretary of the Dominion Dairy Council.

Seek More Business With Soviet Russia

American Manufacturers In Favor Of Barter Trade Scheme

New York.—Seeking to stimulate American trade with Soviet Russia, preparations are being made here for the appointment of a committee to lay the foundation for a barter trade plan between the two countries.

Decision to appoint the committee was reached at a conference sponsored by the American Manufacturers' Export Association which was attended by more than 200 domestic producers.

Believing that world trade conditions are more favorable than ever before for expansion of the American-Russian trade it is the aim of the business interests here to boost annual sales of goods by the United States to Russia to \$100,000,000 a year, and imports from Russia to \$25,000,000 annually. It is estimated that this year's trade between the two countries will amount to less than \$25,000,000.

Fifty Years Of Service

Ottawa, Ont.—G. J. Desbarats, 71, deputy minister of national defence, is being retired at the end of the present month, according to information issued from the department here. His retirement brings to an end 50 years of service.

SUNDAY SCHOOL LESSON OCTOBER 23

PROBLEMS OF THE MODERN HOME

Golden Text: "As for me and my house, we will serve Jehovah."—Joshua 24:15.

Lesson: Joshua 24:14, 15; Mark 10: 2-12; Ephesians 6:1-9.

Devotional Reading: Psalm 127.

Explanations and Comments

The Challenge: Choose Whom Your House Will Serve, Joshua 24:14, 15.—Because of all God had done for them, the children of Israel owed Him loyalty, undivided service, Joshua declared. They must put away the gods which their fathers served beyond Euphrates and in Egypt. If, however, they were determined not to serve Jehovah, they could choose whether they would serve the gods their fathers had served and had renounced, or the gods of the people of the land where they had settled. This he said ironically, showing them what alternatives they had if they would not be loyal to Jehovah.

"Man must worship. He must have a god. That is universally true. If men will not serve the Lord, then let them choose whom they will serve, only let them make their decision in the clear light of what the kingdom of God really means. If today men say of God's appointed and appointed King, 'We will not have this Man to rule over us,' then let us urge them to choose among the alternatives which are offered them; only let them compare the results of the reign of Christ over human life with those of any other authority to which loyalty may be yielded."—G. Campbell Morgan.

"And to every man there openeth a high way and a low: And every man decideth Which way his soul must go."—Oxenham.

"But," Joshua added, "as for me and my house, we will serve Jehovah." "The world will pay little heed to our exhortation if we do not follow it up by personal practice."—Joseph Parker.

Ottawa, Ont.—The act effecting redistribution of the membership in the House of Commons, based on the census of 1931, was presented by Premier R. B. Bennett and given second reading.

While the representation is altered in four provinces the total, 245 members, remains unchanged. Nova Scotia loses two members, being reduced from 14 to 12, while British Columbia gains two, the total being increased from 14 to 16.

New Brunswick's representation is fixed at 10 members, a loss of one member, while Alberta gains one, with a total of 17.

The redistribution, which will stand for 10 years, is based on the population of Quebec. Under the British North America act the representation of the other provinces in the House of Commons is fixed by the ratio of 65 to the population of Quebec.

For the next 10 years the representation will be as follows: Quebec, 65; Ontario, 82; Nova Scotia, 12; New Brunswick, 10; Manitoba, 17; British Columbia, 16; Prince Edward Island, four; Saskatchewan, 21; Alberta, 17; and the Yukon Territory, one.

New Burdens For Britain

Ottawa Agreements No Advantage Opinion Of Lord Snowden

London, Eng.—The Ottawa agreements mean new burdens for the British public, Lord Snowden, who was Chancellor of the Exchequer in the former Labor Government, and recently resigned from the present National ministry, said in an article in the Financial News.

"In every case concessions made by Britain mean an increase in the prices of commodities—mainly necessary foodstuffs," Lord Snowden writes.

"In the case of the Dominions all changes give relief to Dominion traders and consumers.

"I have it on very reliable authority that expert examination revealed the fact that instead of giving Great Britain an advantage there will be an actual loss in the present trade with Canada."

Wheat Movement To North

Shipments To Churchill Show Signs Slowing Up

Prince Albert, Sask.—Wheat movement from this division of the Canadian National Railway to Churchill is slowing up slightly after wheat drawn from here has nearly twice filled the elevator at Churchill. Prior to August this year, 2,500,000 bushels had been shipped and since that date 1,500,000 more bushels have been sent northward from this division. There remains more than half a million bushels yet to be shipped.

Dies From Injuries In Harvesting Accident

Young Farmer Was Caught In Machinery Of Combine

Saskatoon, Sask.—Severely injured in a harvesting accident, October 1, Robert Potter, 26-year-old farmer of the Sovereign district, died in hospital here.

Mr. Potter was injured when he was caught in the machinery of a combine he was operating on his farm twelve miles southeast of Sovereign.

Research Inefficient

Edmonton, Alberta.—"Research in Canada is most extravagant and most inefficient," said Hon. George Headley, Minister of Agriculture in the Alberta Government, addressing a meeting of the provincial advisory committee on agriculture, which was meeting here. "It is carried on at a terrific cost, and we are not getting results proportionate," he added.

Lost Hunters Found

Gravenhurst, Ont.—Drenched to the skin and suffering from exposure after spending most of two days in Muskoka's rocky woodland, two Toronto men and one from Kitchener, lost while partridge hunting, were found. All were in good condition.

British Exports Lower

London, England.—British exports for the month of September were valued at £26,228,666 for the lowest total recorded for many years, according to trade figures announced by the board of trade recently.

Anniversary services, Oct. 30, Rev. H. D. Leitch of Drumheller, our guest speaker.

TO BE STRONG

Goes the battle and strength can be attained by persistent effort.

Alberta grain growers can unite around Alberta Pool Elevators.

Deliver your grain to
ALBERTA POOL ELEVATORS

Mothers Must Sacrifice

IN times like these, mothers have to sacrifice in order to give their children the advantages of a normal youth. Good, nourishing food is most essential. Since bread is Nature's best food, smart mothers know it is foolish to economize on flour when even the best is inexpensive. Prairie mothers have considered Robin Hood flour the Standard of Excellence for more than a generation. It is CLEAN, PURE and of highest food value.

STUDY THIS PICTURE— THEN THINK

The difference in cost between CLEAN, PURE Robin Hood flour, and CHEAP, poorly milled flour is only 1c PER DAY FOR A FAMILY OF FOUR.

The Alberta Pacific Grain Company Ltd.

COMMENCING business in the North-West Territories in 1901—four years prior to the formation of the Province of Alberta—The Alberta Pacific Grain Company, and predecessor Companies, carries in its records a long line of service to the farmers of Alberta.

ALBERTA Grain Company, Limited, under the able management of John I. McFarland, commenced business in 1901. Total production of wheat in Western Canada in that year had reached less than 65,000,000 bushels. Under Mr. McFarland's policy of fair dealing with all farmers, the growth of his Company kept pace with increasing wheat production in the West. In 1912 Alberta Pacific Grain Company, Limited, was brought into being under guidance of Mr. McFarland, and consisted of an amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

THE "A.P." organisation continued to grow. Its elevators followed the railway construction crests into the newly cultivated areas of Alberta and extended its operations into Saskatchewan and Manitoba.

WITH the completion of the building of the Panama Canal the "A.P." became a pioneer in the movement of grain to import markets through the Western route. Terminal elevators, having a capacity of 6,250,000 bushels have been acquired by the Company at the Port of Vancouver.

THE "A.P." system has passed through the financial stress of 1907-08; the war and its aftermath; boom periods and the business upheaval of the past three years—a period of years, many of which have been obscure and filled with business uncertainties. In all its three decades of dealings with thousands of farmers and the handling of hundreds of millions of bushels of grain, the Company has never failed in an obligation to any client. Among its customers today are pioneers of Alberta who drew the first bushel of grain they produced in the Province to an "A.P." elevator.

FAIR-DEALING with its customers, coupled with competent office and field staffs; efficient physical grain handling equipment and desire and ability to return to the grower the most that can be obtained for his grain, has brought the "A.P." system from its humble beginning in 1901 to its present position in the grain trade of Canada.

THE policies of the "A.P." today are and will continue to be, those of the founder of the "A.P." system.

J. I. McFarland

GENERAL MANAGER

Brewed in Alberta
BEERS are PURE AND
WHOLESOME

Months of careful brewing of high-grade grains, choice hops and pure mountain water, go to make these sparkling, full-flavored beverages. Aged for months and fully fermented before they reach the public. Drink properly brewed beers only, the purest of all beverages.
